

WHAT WILL IOWA'S TAX REFORM DO?

Highlights from a study completed by Beacon Hill Institute:

CREATE JOBS FOR IOWANS

8,270
JOBS

Full implementation of the tax bill provides an economic boost - it will create a total of 8,270 private sector jobs by 2024.

PUT DOLLARS BACK IN THE HANDS OF TAXPAYERS

\$673,000,000

Once fully implemented, Iowa households will enjoy a real disposable income increase of \$673 million.

ENCOURAGE INVESTMENT FROM COMPANIES

\$100,000,000

When the corporate income tax rate cut is fully implemented, it will provide an increase to the return on investment and ignite a surge in capital investment, which would increase by \$100 million in 2024.

MAKE IOWA MORE COMPETITIVE

According to the Tax Foundation, Iowa ranks as the 11th worst state for its overall business climate. Iowa needed to act in order to compete with other states for jobs and investment.

MODERNIZE AND SIMPLIFY IOWA'S TAX CODE

Not only reduces rates but simplifies Iowa's tax code by:

- ✓ Reducing the number of brackets
- ✓ Aligning Iowa's corporate income tax laws to federal tax code
- ✓ Updating outdated tax credits
